

## **French Intent**

By teaching French, we aim to foster children's curiosity and deepen their understanding of the world. The French curriculum will provide children with the ability to both express themselves and enquire about French culture at a beginner's level. We believe that conversational French, that is useful in everyday contexts, provides a solid foundation upon which to foster pupil's interests further.

Our French curriculum will provide a foundation for the children to develop basic, grammatically correct conversational French. This will be achieved by the provision of a well-structured progressive French curriculum that enable pupils to express their ideas and thoughts in French and to understand and respond to its speakers, both in speech and in writing.

Through the teaching of French, Endsleigh Holy Child has the following aims:

- Increase pupils' awareness, knowledge and understanding of French language and culture.
- Develop pupils' ability to confidently converse in French by providing children the vocabulary and grammatical skills required to structure communication for everyday conversation.
- Develop children's ability to read and write short verses in French.
- Enable children to confidently hold short conversational exchanges of introduction and inquiry.
